

# construction & engineering - energy & power stations

## Our team's non-contentious experience includes:

Advising a major national contractor in relation to the contract arrangements for the construction of a new renewable energy plant.

Assisting a major multi-national contractor with the negotiation of a worldwide, long-term contract for the development of floating LNG plants.

Advising a major multi-national contractor with the drafting and negotiation of an EPC contract for a major petrochemical project in the Middle East.

Assisting a major international contractor with the drafting and negotiation of boiler supply and maintenance contracts for coal fired power stations in the Middle East.

## Our team's contentious experience includes:

Continuing to act for a major international consulting, design and construction services company in relation to a US\$333 million high court claim brought against it by the owner of a hydroelectric power station in Panama.

Advising a major international contractor regarding an LCIA arbitration in relation to its numerous and significant claims for damages and extensions of time and the owner's claim for liquidated damages in respect of a large wind turbine farm.

Acting for a large multi-national heavy engineering company on an €80m ad-hoc international arbitration relating to a claim by the owner of a power station in Spain for liquidated damages.

Advising a joint venture of two well-known international contractors regarding their rights and obligations in respect of take-over and the owner's right to use the plant and apply liquidated damages under a long term LNG project in Asia.

Advising a major international contractor in respect of its claims for extensions of time for work on a major gas turbine power plant in the UK.

**North Midland Construction PLC v AE&E Lentjes Uk Ltd** 2009 EWHC 1371 (TCC) - we acted for North Midland Construction PLC to seek declarations in respect of the application of the Housing Grants Construction and Regeneration Act 1996 to certain contracts to provide flue gas desulphurisation units to each of two coal fired power stations.
