

CleanTech

**Browne
Jacobson**

“Flourishing practice noted for its representation of clients such as contractors and employers. Experienced in both national and international projects, in both contentious and non-contentious contexts.”

Chambers

We're committed to working with clients in tackling climate change. We've closed some of the most important CleanTech and renewable energy projects in the market during recent years. Our highly experienced CleanTech team provides a full and seamless range of practical and innovative solutions to our clients on CleanTech and renewable energy projects, both domestically and internationally.

At Browne Jacobson we are known for being experienced, trusted advisors across a wide range of clean technologies including hydrogen, wind, solar, battery, EV charging infrastructure, waste, biomass, nuclear and tidal.

We cover the full asset life cycle, from the origins of the underlying technological concept, through the regulatory, procurement, planning and authorisation phase to the raising of equity and debt capital, development and operation, the everyday operational aspects (including negotiating the ongoing commercial contracts, advising on agreements with governments, licence/distribution agreements and securing/protecting the related IP) and the sale/acquisition of assets/businesses, including the provision of sector-focused advice on asset-level legal due diligence.

Our CleanTech and renewables practice also includes drafting and negotiating commercial energy contracts. We act for sponsors, equity investors, debt financiers, E&I major corporates, public sector clients, tech SMEs, university spinouts, contractors, construction companies, developers, landowners and energy purchasers, and are familiar with the concerns and objectives of all the participants in these transactions.

Most importantly, we're committed to driving forward the important issue of environmental sustainability and climate change. We recognise that tackling climate change and achieving net zero is of fundamental importance, with this commitment underpinning every client relationship.

Browne Jacobson, at a glance

Working together

Members of the Energy and Utilities Alliance (EUA) a not-for-profit trade association that provides a leading industry voice helping to shape the future policy direction within the energy sector.

We work closely with the Midlands Engine on sustainability policy – hosting events and helping to draft the industry-led Ten Point Plan for Green Growth for the midlands region.

A founding member of Pangea Net and a specialised energy and renewables group therein, a non-exclusive network of full-service law firms across the globe, enabling our clients to access high-quality, specialist, foreign, law-legal advice, efficiently and cost-effectively.

“They deliver real added value and they don’t just think about the legal problem before them, but also the overall strategic issues.”

Chambers

Our expertise

We advised Clean Power Hydrogen plc on its admission to AIM and continue to support subsidiary CPH2 on international deals to commercialise its cutting-edge membrane-free electrolyser technology for the production of highly pure hydrogen.

We have advised Clean Air Power, a global innovator in the transport sector with a long history as a provider of low carbon technologies, assisting with collaboration agreements on hydrogen fuel injector developments.

Llywodraeth Cymru
Welsh Government

We have advised the Welsh European Funding Office on a significant £31m funded tidal energy project. Once developed, the renewable energy infrastructure created by the project will become one of the largest tidal stream sites in the world.

We have advised on investment rounds and grant funded R&D collaborations for H2GO Power, an award-winning developer of green technology using its proprietary hydrogen storage technology and software.

We have worked with Aceleron on its growth strategy fundraising and commercialisation of patented technology. Aceleron is a developer of longer life batteries which are set to be piloted for domestic energy storage and electric vehicles.

We work very closely with the Midlands Engine on sustainability policy and strategy. We have recently helped to draft the Midlands Engine 10-point plan for clean growth, which includes hydrogen as a key focus area.

We work with Winbro, a world leader in the design and manufacture of advanced machines and technologies based on non-conventional processes. Winbro's high-technology machine systems produce holes and forms in components used in the most demanding parts of the fuel cell industry.

We have advised Mace Group on IP protection and commercialisation of new innovative building techniques, along with wide ranging construction, data, trade mark and IT support.

We are assisting with the development of a comprehensive licensing template to be used with our client's key partners.

Explore our practices and services

“The firm demonstrated real depth across its energy and infrastructure practice in assisting the delivery of a string of high profile and complicated transactions for us.”

Igneo Infrastructure Partners

Practices

The diversity of the E&I sector and the nature of the transactions in such a space requires the fullservice practice we offer, which includes:

Projects (inc. PFI/PPP)
Banking and finance
Corporate M&A
Commercial contracts
EPC/Construction
Real estate
Regulatory/Planning/ Subsidy control

Environment and climate change
IP and technology
Litigation and disputes
Insurance
Procurement
Tax
Energy

Sectors

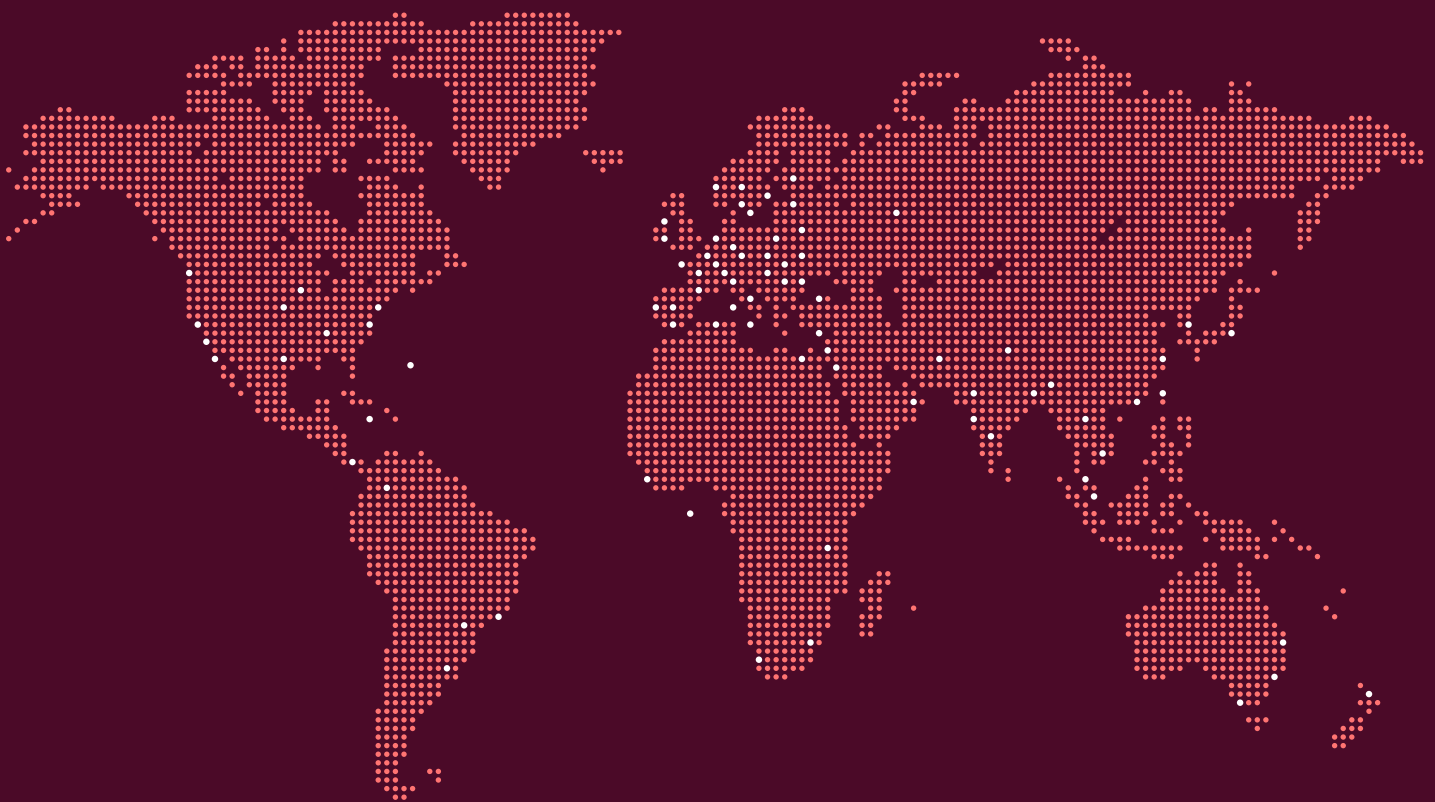

We recognise that our clients need sector-driven advice, and our team is highly experienced across a wide range of sub-sectors including:

Social infrastructure
Waste
Water
Heating
Battery tech
Electricity
Electric vehicles
Wind

Solar
Hydrogen
Oil and gas
Digital and smart infrastructure
Road
Rail
Aviation
Maritime

Our international reach

We maintain close working relationships with leading lawyers in other jurisdictions through the Pangea Net global network and with firms that we've identified as being the best in their markets. This enables our clients with overseas interests and international clients to access high quality, specialist legal advice efficiently and cost-effectively.

“I also want to thank the excellent work of the Browne Jacobson team on this project, whose in-depth knowledge of our business and experience in this sector has been invaluable. As usual they went the extra mile to help us achieve this successful outcome.”

Browne Jacobson is the brand name under which Browne Jacobson LLP and Browne Jacobson Ireland LLP provide legal and other services to clients. The use of the name "Browne Jacobson" and words or phrases such as "firm" is for convenience only and does not imply that such entities are in partnership together or accept responsibility for the acts or omissions of each other. Legal responsibility for the provision of services to clients is defined in engagement terms entered into between clients and the relevant Browne Jacobson entity. Unless the explicit agreement of both Browne Jacobson LLP and Browne Jacobson Ireland LLP has been obtained, neither Browne Jacobson entity is responsible for the acts or omissions of, nor has any authority to obligate or otherwise bind, the other entity.

Browne Jacobson LLP is a limited liability partnership registered in England and Wales, registered number OC306448, registered office Mowbray House, Castle Meadow Road, Nottingham, NG2 1BJ. Authorised and regulated by the Solicitors Regulation Authority (SRA ID 401163). A list of members' names is available for inspection at the above office. The members are solicitors, barristers or registered foreign lawyers.

Browne Jacobson Ireland LLP is a limited liability partnership registered in the Republic of Ireland. Regulated by the Law Society of Ireland and authorised by the Legal Services Regulatory Authority to operate as a limited liability partnership. A list of its partners is available at its principal place of business at Viscount House, 6-7 Fitzwilliam Square East, Dublin 2, D02 Y447.
