

Harnessing the benefits of technology and innovation has never been more important in the drive to improve patient care

HealthTech, MedTech, DigiTech – harnessing the benefits of technology and innovation has never been more important in the drive to improve patient care and deliver efficiencies in the NHS.

22 November 2019

HealthTech, MedTech, DigiTech – harnessing the benefits of technology and innovation has never been more important in the drive to improve patient care and deliver efficiencies in the NHS. We know and understand the importance of the importance of MedTech to our clients both suppliers and customers and that is why we will be following NHS England's consultation on its proposal for a MedTech Funding Mandate closely. The proposal is aimed at "getting innovative medical devices, diagnostics and digital products to patients faster."

Now is your chance to shape the conversation and the proposal. The online consultation which is now open and closes on 18th December 2019 can be [accessed here](#). NHS England is also hosting two engagement events in London and Leeds which you register your interest in and if you are interested in attending we may see you there!

To talk to us about how we can help you with the procurement or supply of MedTech, HealthTech or DigiTech products please [get in touch](#).
