

Private Patient Units: expanding through partnership – views from private sector providers

📍 Browne Jacobson LLP

📅 30 September 2025

Following our two successful PPU Roundtables, we will be continuing the conversation and looking at more detail into the **opportunity for Private Patient Units (PPUs) to grow**, particularly to expand through creating partnerships like those we have seen at The Christie and University Hospitals Birmingham.

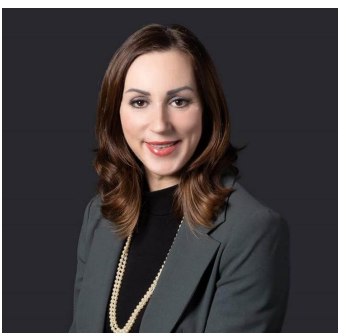

During this session, we will have a private sector provider in attendance to open up the conversation as to what they are looking for in their partnerships with the NHS and how they want to work with you on expanding your PPUs.

We invite you to join this roundtable event, where you will have the opportunity to engage with other NHS PPUs and sector specialists to explore these topics and more.
