

Solar panels guide: contractual and liability issues to be aware of' webinar

25 April 2024

This webinar took place on Thursday 25 April 2024 and is now available on-demand.

Please register to watch the webinar or click "already registered" if you've registered previously on the platform.

The webinar discusses the practical, contractual and liability issues involved in installing and operating solar panels.

We have helped clients successfully install solar panels across the UK, big and small. This webinar looks at some of the practical, contractual and liability issues involved in installing, owning, operating and maintaining solar panels.

Whether you are an agricultural or business landowner, a retail, leisure, logistics, manufacturing business with high electricity needs (and maybe a property footprint), or a public body looking to expand net zero infrastructure, this webinar has something for everyone. Whether you are considering receiving, generating, providing, installing or distributing solar power, we will explain some of the legal challenges of solar panel projects.

We aim to equip you with a list of practical points to look into when considering installing or operating a photovoltaic system together with some suggested solutions.

Watch on-demand
