

Shared Insights: Avoiding pitfalls when implementing AI in the health and care sector

📍 Online

📅 10 February 2026

This session will be chaired by **Gerard Hanratty**, Head of Health and Life Sciences, who will share insights and practical hints and tips for health and care organisations when implementing **artificial intelligence**.

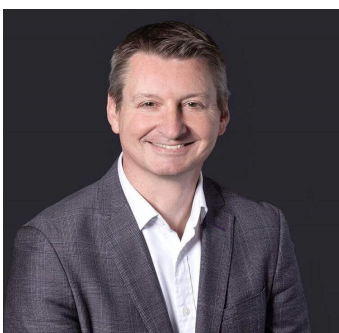

Particularly in light of the ambitious commitments in the [10 Year Plan](#) to make the NHS the most “AI enabled care system in the world”, this will include an exploration of the risks and pitfalls of implementation and discussion of effective policies and governance to support that implementation, based on our learning and the advice we are providing to health and care organisations through the journey to digitalisation.
