

Banking transaction update - Summer 2020

23 September 2020

During what has been a difficult few months, it has been encouraging to see the energy and activity amongst funders as they support businesses. We have been absolutely delighted to assist our clients during this difficult time.

More recently we have seen the transactional market shift up a gear, and we expect this trend to continue for the rest of 2020. Of course this won't be without its challenges, however we will continue to help our clients thrive and make a positive difference.

Download our banking transaction update for Summer 2020 to find out more.
