

Embracing AI in schools: Ensuring accountability, compliance and good governance

13 December 2024

This webinar took place on 28 January 2025 and is available on-demand.

The education sector was at a crossroads with artificial intelligence (AI) integration, facing both opportunities for innovation and challenges in accountability, safety, and compliance.

During this webinar, we explored these issues, guiding school leaders to foster innovation and gain efficiencies from AI, while putting good governance at its heart.

We covered:

Safely embracing the potential of AI in education.

- Developing AI governance, safety, and compliance measures.
- Cultivating an AI-positive staff culture.
- AI integration strategies for schools.
- Interactive Q&A.

Why should you have attended? You would have gained insights into AI's potential and risks in education, learned practical strategies for ethical AI use, and developed a plan for compliance and safety frameworks tailored to your setting.

Ultimately, you would have built the confidence to safely harness the power of AI to innovate and drive efficiencies and standards, while striking the right balance to mitigate risk.

Learning outcomes: Having attended this webinar, you would have left with:

- A balanced view of AI's impact on and opportunity in education.
- A plan to help you ensure safety and compliance.
- Strategies for responsible AI integration.
- Skills to foster an innovative AI culture.
- Top tips, supporting resources, and access to expert advice.

Don't be left standing - or worse, exposed and at risk - by not getting a grip on using AI safely to support your organisation.
