

Insurance annual review 2021-2022

In our review of key trends from 2021 and key trends to watch for 2022, we share insights that will enable you to navigate challenges, and make the most of the opportunities across various sectors and lines of business.

31 January 2022

Welcome to our annual insurance review 2021-2022.

In our review of key trends from 2021 and key trends to watch for 2022, we share insights that will enable you to navigate challenges, and make the most of the opportunities across various sectors and lines of business.

Like last year, the Covid-19 pandemic and Brexit have presented, and will continue to present, many new challenges for insurance markets and financial services generally.

The last 12 months have once again tested business and human resilience, and these extraordinary times are likely to continue to do so. Together with our clients, we are finding new ways to help the industry respond and transform, enhancing firms' stakeholdercentric approach to Environmental, Social and Governance factors.

In our review, we share updates and insights in relation to the most important issues to help ensure that you are informed and prepared for 2022 and beyond.

If you have any queries or would like more information or support with any of the issues raised in our review, please do not hesitate to contact me or the authors directly; we would be delighted to hear from you.
