Hollie is a Trainee Solicitor in our health real estate team. Her legal experience has been predominantly focused in the health sector and has included work for both public and private sectors. Hollie has undertaken secondments for NHS England and a private hospital.

Hollie’s experience in the legal sector started with two years in our commercial health team where she undertook a lot of her work helping on acquisitions and dissolutions of care homes and dental practices. She then furthered her health sector experience by joining our health advisory litigation team for a year where she took an eight-month secondment to a private hospital. Hollie is now in our health real estate team advising NHS Trusts and is currently on secondment with NHS England until the end of this year. Hollie is due to move to our banking and finance team next year.

Hollie is in her fourth year of the Solicitors Apprenticeship and will undertake her Solicitors Qualifying Exams in the next two years. She has taken part in our FAIRE events and loves to get involved with our social mobility work helping show others alternative routes into the legal sector.
