As Head of Client Solutions, Ciara Fenton leads the strategic delivery of tailored solutions that drive measurable value for clients. Ciara ensures that every engagement is aligned with long-term success, with a focus on understanding each client's unique challenges and goals. She works closely with cross-functional teams to design and implement innovative frameworks that enhance service delivery, compliance, and client satisfaction - bringing clarity, confidence, and impact to every project.

Ciara brings a wealth of knowledge and experience in data strategy, data science, and artificial intelligence. She began developing these skills during her time in market research at Kantar and has refined them over more than a decade working in the legal sector. Ciara works across both public and private sectors, helping clients make data-led, evidence-based decisions. Her expertise includes helping clients analyse data across legal panels to ensure clients maximise the value of their legal spend. A passionate advocate for digital collaboration, Ciara champions the development of platforms that present data in the most meaningful way - ensuring Browne Jacobson's legal teams have full visibility of client goals and KPIs, and can align their delivery accordingly.
